## What is Okta? (high-level)

Okta is the identity company that stands for **trust**.

## What does Okta do?

We make our customers successful by enabling them to securely use the best technologies for their business.

## What's the Okta Identity Cloud?

It's an independent and neutral platform that securely connects the right people to the right technologies at the right time.

## Okta's opportunity

Every organization we talk to is on a journey to the cloud, thinking about how to use technology to better engage with their customers, and focused on boosting security. Identity is at the center of all three of these priorities, and Okta is in a unique position to help organizations navigate these trends.

But don't just take our word for it. According to Gartner, IT is a **\$3.8T industry**, enterprise software is **\$431B**, and SaaS is just **\$95B** of that.

*"Okta was key to accelerating our evolution to a **zero trust model**. This was the identity plane where we could introduce so much of the control that we needed to have in order to assess who a person is.*

*So it was actually a way to accelerate, our thinking around zero trust."*
